Portfolio · GitHub · LinkedIn

SUMMARY

Applied Data Scientist with nearly 1.5 YOE building end-to-end AI/ML solutions across fintech, financial automation, pharma, and medical research. Skilled in Data Science, Machine Learning, Generative AI, multi-agent systems, model development, data pipelines, and production deployment, with experience taking solutions from research and experimentation to production-ready systems.

SKILLS

- **Foundational Mathematics** : Linear Algebra, Calculus, Probability and Statistics
- **Programming and Data** : Python, NumPy, Pandas, Polars, SQL
- **Generative AI** : LangChain, LangGraph, Multi-Agent Systems, RAG, HITL, MCP
- **Machine Learning** : Scikit-learn, XGBoost, Feature Engineering, Model Evaluation, Hyperparameter Tuning
- **Deep Learning** : PyTorch, CNNs, YOLOv8, Transfer Learning, Model Training and Evaluation
- **DevOps** : FastAPI, Docker, AWS, MLflow, Git/GitHub, CI/CD, ETL/ELT Pipelines

WORK EXPERIENCE

ML and GenAI Engineer

Globalspace Technologies Ltd.

Jan 2026 – Present
Navi Mumbai, MH, India

1. Budget Automation & Incentive Calculator

- A separate execution tree for every MR worked for only ~20–30 employees and could not support a hierarchy of thousands.
- Built a dynamic scoring engine that auto-allocates MRs as they join or leave, plus HITL policy configuration and post-edit rebalancing.
- Replaced per-MR trees with one scalable hierarchy model and enabled business users to manage incentives without deep schema or admin expertise.

2. PatGPT

- A RAG-only approach could not adequately support decision-making across 3M+ pharmaceutical sales and tender records.
- Built an agentic planning assistant for forecasting, simulation, prediction, and historical analysis, with HITL checkpoints and evidence-bound answers.
- Delivered a production-ready platform with SSE streaming, idempotent retries, and checksum-verified data promotion and rollback.

Freelance Automation Developer

Propelligence Advisors Pvt. Ltd.

May 2025 – Jan 2026
Thane, MH, India

- Reconciling 10,000+ PR and GSTR-2B invoices took 5–6 days per cycle because matches were non-exact and required manual validation.
- Engineered an automated reconciliation pipeline using fuzzy matching ($\geq 80\%$ threshold), Polars, RapidFuzz, and constant-memory report generation.
- Cut reconciliation time by >99.9% and contributed to Granska, a five-module audit automation suite adopted by 2 CA firms and ~20 auditors.

PROJECTS

1. Chessablanka – Chess Position Analyzer | GitHub

Apr 2025 – Jan 2026

- Analysing a chess position from a photograph normally requires expert board transcription and evaluation.
- Built an end-to-end CV pipeline for board detection and grid mapping with a custom YOLOv8 model trained on 700+ images, augmented to 1,700 via Roboflow.
- Achieved 98.57% detection accuracy on 500+ test images and sent positions to Stockfish for instant evaluation and best-move analysis.

2. NeuroTRIBE – Cortical Response Analysis for ADHD Research | GitHub

Aug 2026 – Present

- No existing tool objectively tests whether ADHD alters stimulus-evoked cortical responses against a baseline.
- Built a TRIBE v2 pipeline over Healthy Brain Network movie-fMRI data to compare confirmed-ADHD participants with a matched cohort.
- Enabled autonomous Docker-Compose orchestration for objective analysis while treating legally gated inputs as non-blocking.

3. Cattle Monitoring using DBSCAN and ESP32 | GitHub

Oct 2025 – Nov 2025

- Farmers lacked a way to track free-grazing cattle without performing manual rounds.
- Led a team building a distributed system of one ESP32 master and N child nodes, streaming GPS/RSSI data to a Flask/MongoDB backend.
- Applied DBSCAN to automatically identify grazing zones on a live Next.js tracking dashboard.

EDUCATION

Bachelor of Engineering in Information Technology

Phoenix Academy of Management and Technology, affiliated to University of Mumbai

Mumbai, MH, India

- CGPA: 8.5/10

ACHIEVEMENTS

- **Qualified GATE** — Data Science and Artificial Intelligence (DA) paper
- **Published Automation Suite for CA & Audit Firms** — Adopted by 2 CA firms and used by about 20 auditors
- **First Place, College Hackathon** — Secured 1st position at college-level hackathons
